Compact[®]
MULTI PURPOSE JUICER & MINCER

- JUICES
- MINCES
- PUREES

10 machines in one

The new **Compact** uses minimal bench space as the name implies. The low RPM (75-80) of the **Compact** and the gentle crushing and squeezing process, is similar to a Cold-Press method, therefore generating minimal friction heat. Your juice can retain up to **60% more nutrients** than conventional juicers and the valuable enzymes remain alive. The **live enzymes** are what aid your digestion and help your body absorb nutrients, **boost your energy levels and immune system.** As an added bonus, your juice remains stable, nutritious and fresh for up to **48 hours** (juice may be stored in a sealed container in the fridge.) What sets the new **Compact** multi-purpose

juicer/mincer apart from regular juicers, is that it can juice just about anything including wheatgrass. It will grind coffee beans, make nut butters, homus, pesto, salsa, dressings, dips, baby food, pasta and frozen desserts. It even has a completely separate mincing attachment that will professionally mince meat, chicken and fish as well as a sausage making nozzle. You won't believe how quiet the machine runs and how easy it is to clean, making it one of the most versatile and best value kitchen appliances available today.
